

# Support for Continued Professional Development

## World Class Curriculum

We are able to support your school(s) in a number of ways to achieve a World-Class Curriculum. All prices for support are subject to individual circumstances so please get in touch in order for us to be able to provide you with a quote accordingly.

### Continued Professional Development (CPD) Workshops

We offer a number of one off workshops and other series of CPD sessions to suit your needs and interests. Listed here are examples of CPD sessions that we are currently running in a variety of settings (individual Schools, groups of schools, Education Ministries).

#### Is your curriculum World-Class?

As a result of both analysis of international research and its work around the world, the Foundation has identified ten principles of a World Class Curriculum. In these workshops, we will enable you to consider how these principles can be used for the basis of curriculum development and also as an audit framework in order to evaluate an existing curriculum.

#### Designing a Creative Curriculum

Exploring what we mean by a 'creative curriculum' including looking at the evidence for the benefits of adopting this approach and how this effects pedagogy, practice and policy.

#### Composing a curriculum for *YOUR* school

Exploring together how a curriculum can take inspiration from its own locality in order to meet the needs of its own learners whilst taking into consideration national requirements and international expectations.

#### Global Thinking

Helping educators to develop their understanding and skills related to higher order thinking skills. We consider evidence from related studies in order to investigate how a move from knowledge to creativity can empower pupils to make accelerated progress.

#### Painting the World by Numbers

Exploring a 'context rich' approach to teaching and learning in numeracy and mathematics for 7 to 14 year olds using data and statistics that describe different aspects of globalisation.

## World Class Curriculum Accreditation

In addition to the CPD opportunities above, we can support schools in three ways to gain a World Class Curriculum Accreditation.

### Developing a World Class Curriculum

#### Explore

We deliver a **one day whole school training session** in order to fully illustrate and explain the values and principles of a World Class Curriculum and support you to **evaluate and review your existing curriculum** in line with this model.

#### Build

We visit you on **two further separate occasions for a half day** to support you build on your existing good practice and plan for the further development of a World Class Curriculum.

#### Analyse & Evaluate

We then make a **final visit** once you feel you are ready to be assessed as to whether your school has successfully met the criteria necessary to be awarded the **World Class Curriculum Accreditation**.

### Identifying a World Class Curriculum

#### Explore

We deliver a **one day whole school training session** in order to fully illustrate and explain the values and principles of a World Class Curriculum and support you to **evaluate and review** your existing curriculum in line with this model. We will provide you with some key inquiry questions to help you to continue to build your World Class Curriculum.

#### Assess & Review

We then make a **second visit** once you feel you are ready to be assessed as to whether your school has successfully met the criteria necessary to be awarded the **World Class Curriculum Accreditation**.

### World Class Curriculum Accreditation

We then make a **single visit** to your school to assess whether your school has successfully met the criteria necessary to be awarded the **World Class Curriculum Accreditation**.
